**Re: In the Matter of Petition of USTelecom for Forbearance Pursuant to
47 U.S.C. Section 160(c); WC Docket No. 18-141; Category 1**

Dear FCC,

I work with Sonic.net who provides me with broadband services where I don't need to use wireless. It's a great service bundled with my landline. They are working with fiber optics as well which really is an exciting possibility and safe. Being wifi sensitive, this is a life saver for me. I hardly use my cell phone and limit my exposure as much as possible.

To limit competition to Big Corporate interests is not the way to allow for personalized service and what is possible in other digital connections.

To hike pricing to create these monopolies is a poor direction from a consumers protection and welfare standpoint. It makes it more known that there is little care for the consumer and all in the pockets of the multinationals.

I hope you decide to allow for other competitive companies to give service in the way customers truly appreciate them.
